

**UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION 5**

IN THE MATTER OF:

Belmont Plating Works, Inc.
9145 King Street
Franklin Park, Illinois 60131

ATTENTION:

Mark Toni
President

Request to Provide Information Pursuant to the Clean Air Act

The U.S. Environmental Protection Agency is requiring Belmont Plating Works, Inc. (BPW or you) to submit certain information about the facility at 9145 King Street, Franklin Park, Illinois. Appendix A provides the instructions needed to answer this information request, including instructions for electronic submissions. Appendix B specifies the information that you must submit. You must send this information to us within 30 calendar days after you receive this request.

We are issuing this information request under Section 114(a) of the Clean Air Act (CAA), 42 U.S.C. § 7414(a). Section 114(a) authorizes the Administrator of EPA to require the submission of information. The Administrator has delegated this authority to the Director of the Air and Radiation Division, Region 5.

BPW owns and operates an emission source at the Franklin Park, Illinois facility. We are requesting this information to determine whether your emissions source is complying with the CAA and the National Emission Standards for Chromium Emissions From Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks at 40 C.F.R. Part 63, Subpart N (Subpart N) and the National Emission Standards for Hazardous Air Pollutants (HAPs): Area

Source Standards for Plating and Polishing Operations at 40 C.F.R. Part 63, Subpart

WWWWWW (Subpart 6W).

BPW must send all required information to:

Attn: Compliance Tracker, AE-17J
Air Enforcement and Compliance Assurance Branch
U.S. Environmental Protection Agency
Region 5
77 West Jackson Boulevard
Chicago, Illinois 60604

BPW must submit all requested information under an authorized signature with the following certification:

I certify under penalty of law that I have examined and am familiar with the information in the enclosed documents, including all attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are, to the best of my knowledge and belief, true and complete. I am aware that there are significant penalties for knowingly submitting false statements and information, including the possibility of fines or imprisonment pursuant to Section 113(c)(2) of the Clean Air Act, and 18 U.S.C. §§ 1001 and 1341.

As explained more fully in Appendix C, you may assert a claim of business confidentiality under 40 C.F.R. Part 2, Subpart B for any part of the information you submit to us. Information subject to a business confidentiality claim is available to the public only to the extent, and by means of the procedures, set forth at 40 C.F.R. Part 2, Subpart B. If you do not assert a business confidentiality claim when you submit the information, EPA may make this information available to the public without further notice. You should be aware, moreover, that pursuant to Section 114(c) of the CAA and 40 C.F.R. § 2.301(a) and (f), emissions data, standards, and limitations are not entitled to confidential treatment and shall be made available to the public notwithstanding any assertion of a business confidentiality claim. Appendix C provides additional information regarding the meaning and scope of the term "emissions data."

This request is not subject to the Paperwork Reduction Act, 44 U.S.C. § 3501 *et seq.*, because it seeks collection of information from specific individuals or entities as part of an administrative action or investigation.

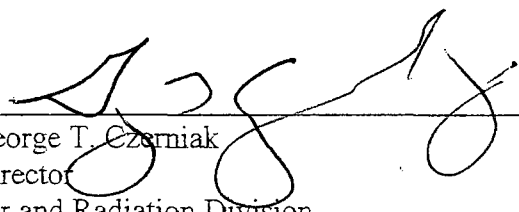

We may use any information submitted in response to this request in an administrative, civil, or criminal action.

Failure to comply fully with this information request may subject BPW to an enforcement action under Section 113 of the CAA, 42 U.S.C. § 7413.

You should direct any questions about this information request to Ray Cullen at (312) 886-0538.

Date

9/22/15

George T. Czerniak
Director
Air and Radiation Division

Appendix A

When providing the information requested in Appendix B, use the following instructions and definitions.

Instructions

1. Provide a separate narrative response to each question and subpart of a question set forth in Appendix B.
2. Precede each answer with the number of the question to which it corresponds and at the end of each answer, identify the person(s) who provided information used or considered in responding to that question, as well as each person consulted in the preparation of that response.
3. Indicate on each document or electronically stored information (ESI) produced, or in some other reasonable manner, the number of the question to which it corresponds.
4. When a response is provided in the form of a number, specify the units of measure of the number in a precise manner.
5. When documents, ESI, or information necessary for a response are neither in your possession nor available to you, explain in your response why such documents, ESI, or information are not available or in your possession and identify any source that either possesses or is likely to possess the documents, ESI, or information.
6. If information not known or not available to you as of the date of submission later becomes known or available to you, you must supplement your response. Moreover, should you find at any time after the submission of your response that any portion of the submitted information is false or incorrect, you must notify EPA as soon as possible.

Electronic Submissions

To aid in our electronic recordkeeping efforts, we request that you provide all documents or ESI responsive to this information request in an electronic format according to paragraphs 1 through 6, below. These submissions are in lieu of hard copy.

1. Provide all responsive documents or ESI in Portable Document Format (PDF) or similar format, unless otherwise requested in specific questions. If the PDFs are scanned images, perform at least Optical Character Recognition (OCR) for "image over text" to allow the document or ESI to be searchable. Submitters providing secured PDFs should also provide unsecured versions for EPA use in repurposing text.
2. When specific questions request data in electronic spreadsheet form, provide the data and corresponding information in editable Excel or Lotus format, and not in image format. If Excel or Lotus formats are not available, then the format you use should allow for data to be used in calculations by a standard spreadsheet program such as Excel or Lotus.

3. Provide submission on physical media such as a compact disk, flash drive, or other similar item.
4. Provide a table of contents for each compact disk or flash drive containing electronic documents submitted in response to our request so that each document can be accurately identified in relation to the response to a specific question. *We recommend the use of electronic file folders organized by question number.* In addition, each compact disk or flash drive should be labeled appropriately (e.g., Company Name, Disk 1 of 4 for Information Request Response, Date of Response).
5. Documents or ESI claimed as confidential business information (CBI) must be submitted on separate disks/drives apart from the non-confidential information. This will facilitate appropriate records management and appropriate handling and protection of the CBI. Please follow the instructions in Appendix C for designating information as CBI.
6. Certify that the attached files have been scanned for viruses and state what program was used.

DEFINITIONS

All terms used in this request for information will have their ordinary meaning unless such terms are defined in the CAA, 42 U.S.C. §§ 7401 *et seq.*, 40 C.F.R. Part 52 (which incorporates the federally-approved State Implementation Plan), Subpart N, or Subpart 6W. Reference is made to EPA regulatory provisions only; however, you should apply the applicable federally-approved state provisions, when appropriate. Definitional clarification is specified below.

1. The term "decorative-chromium electroplating," as defined at 40 C.F.R. § 63.341(a), means a process by which a thin layer of chromium (typically 0.003 to 2.5 microns) is electrodeposited on a base metal, plastic, or undercoating to provide a bright surface with wear and tarnish resistance. In this process, the part serves as the cathode in the electrolytic cell, and the solution serves as the electrolyte. Typical current density applied during this process ranges from 540 to 2,400 amperes per square meter for total plating times ranging from 0.5 to 5 minutes.
2. The terms "document" and "documents" shall mean any object that records, stores, or presents information, and includes writings, memoranda, records, or information of any kind, formal or informal, whether wholly or partially handwritten or typed, whether in computer format, memory, or storage device, or in hardcopy, including any form or format of these. If in computer format or memory, each such document shall be provided in translation to a form useable and readable by EPA, with all necessary documentation and support. All documents in hard copy should also include attachments to or enclosures with any documents.
3. The term, "dry mechanical polishing," as defined at 40 C.F.R. § 63.11511, means a process used for removing defects from and smoothing the surface of finished metals and formed products after plating or thermal spraying with any of the plating and polishing metal HAPs using automatic or manually-operated machines that have hard-faced

abrasive wheels or belts and where no liquids or fluids are used to trap the removed particles. The affected process does not include polishing with use of pastes, liquids, lubricants, or any other added material.

4. The term, "electroforming," as defined at 40 C.F.R. § 63.11511, means an electrolytic process using or emitting any of the plating and polishing metal HAPs that is used for fabricating metal parts. The process is essentially the same as electroplating except that the plated substrate is removed, leaving only the metal plate.
5. The term "electroless plating," as defined at 40 C.F.R. § 63.11511, means a non-electrolytic process that uses or emits any of the plating and polishing metal HAPs in which metallic ions in a plating bath or solution are reduced to form a metal coating at the surface of a catalytic substrate without the use of external electrical energy.
6. The term "electropolishing," as defined at 40 C.F.R. § 63.11511, means an electrolytic process performed in a tank after plating that uses or emits any of the plating and polishing HAPs in which a work piece is attached to an anode immersed in a bath, and the metal substrate is dissolved electrolytically, thereby removing the surface contaminant.
7. The term "ESI" or "electronically stored information" includes any type of information that is stored in an electronic form and includes but is not limited to e-mails, web pages, word processing files, spreadsheets, PowerPoint presentations, audio and video files, databases, and metadata, etc. ESI may be stored in the memory of computers, magnetic disks (such as computer hard drives and floppy disks), optical disks (such as DVDs and CDs), flash memory (such as "thumb" or "flash" drives), and may include ESI located on network drives (including F, G, and H drives), your work desktops, laptops, home computers, and PDAs (e.g., Blackberrys and smart phones), any punch card, disc or disc pack, zip disk, I-pod, digital media player, portable media player, portable hard drive, USB storage device, or other type of portable electronic storage media; any tape or other type of memory generally associated with computers and data processing (together with the programming instructions and other written or electronic material necessary to use such punch card, disc, or disc pack, tape, CD/DVD, zip disk, flash drive, floppy disk, I-pod, digital media player, portable media player, portable hard drive, USB storage device, or other type of portable electronic storage media, together with printouts of such punch card, disc, or disc pack, tape or other type of memory).
8. The term "flash electroplating," as defined at 40 C.F.R. § 63.11511, means an electrolytic process performed in a tank that uses or emits any of the plating and polishing metal HAPs and that is used for no more than 3 cumulative minutes per hour or no more than 1 cumulative hour per day.
9. The term "foam blanket," as defined at 40 C.F.R. § 63.341(a), means the type of chemical fume suppressant that generates a layer of foam across the surface of a solution when current is applied to that solution.
10. The term "hard-chromium electroplating," as defined at 40 C.F.R. § 63.341(a), means a

process by which a thick layer of chromium (typically 1.3 to 760 microns) is electrodeposited on a base material to provide a surface with functional properties such as wear resistance, a low coefficient of friction, hardness, and corrosion resistance. In this process, the part serves as the cathode in the electrolytic cell, and the solution serves as the electrolyte. Hard chromium electroplating process is performed at current densities typically ranging from 1,600 to 6,500 amperes per square meter for total plating times ranging from 20 minutes to 36 hours depending upon the desired plate thickness.

11. The term "malfunction," as defined at 40 C.F.R. § 63.2, means any sudden, infrequent, and not reasonably preventable failure of air pollution control and monitoring equipment, process equipment, or a process to operate in a normal or usual manner which causes, or has the potential to cause, the emission limitations in an applicable standard to be exceeded.
12. The term "plating and polishing metal HAP," as defined at 40 C.F.R. § 63.11511, means any compound of any of the following metals: cadmium, chromium, lead, manganese, and nickel, or any of these metals in the elemental form, with the exception of lead. And material that does not contain cadmium, chromium, lead, or nickel in amounts greater than or equal to 0.1 percent by weight (at the metal), and does not contain manganese in amounts greater than 1.0 percent by weight (as the metal), as reported on the Safety Data Sheet for the material, is not considered to be a plating and polishing metal HAP.
13. The terms "relate to" or "pertain to" (or any form thereof) shall mean constituting, reflecting, representing, supporting, contradicting, referring to, stating, describing, recording, noting, embodying, containing, mentioning, studying, analyzing, discussing, evaluating, or relevant to.
14. The term "stalagmometer," as defined at 40 C.F.R. § 63.341(a), means an instrument used to measure the surface tension of a solution by determining the mass of a drop of liquid by weighing a known number of drops or by counting the number of drops obtained from a given volume of liquid.
15. The term "tensiometer," as defined at 40 C.F.R. § 63.341(a), means an instrument used to measure the surface tension of a solution by determining the amount of force needed to pull a ring from the liquid surface. The amount of force is proportional to the surface tension.
16. The term "thermal spraying," as defined at 40 C.F.R. § 63.11511, means a process that uses or emits any of the plating and polishing metal HAPs in which a metallic coating is applied by projecting heated, molten, or semi-molten metal particles onto a substrate.

The term "wetting agent," as defined at 40 C.F.R. § 63.341(a), means the type of commercially available chemical fume suppressant that materially reduces the surface tension of a liquid.

Appendix B

BPW must submit the following information about the facility at 9145 King Street, Franklin Park, Illinois (the Facility), pursuant to Section 114(a) of the CAA, 42 U.S.C. § 7414(a), within 30 calendar days of receipt of this letter:

1. The amount of HAPs that potentially can be emitted from the Facility annually;
2. For the 5-year period prior to the date of receipt of this request, a list of each chromium-electroplating tank that currently performs, or at one time performed, hard-chromium electroplating or decorative-chromium electroplating at the Facility, including the date each was constructed and the date each permanently ceased operation, if applicable;
3. For each chromium-electroplating tank identified in response to item 1, above:
 - a. If it is a hard chromium-electroplating tank, whether it is open surface or enclosed;
 - b. If it is a decorative chromium-electroplating tank, whether it uses a chromic acid or a trivalent chromium bath;
 - c. For each decorative chromium-electroplating tank that uses a trivalent chromium bath identified in response to item 2.b, above, copies of all records of the bath components purchased, with specification as to which components, if any, are wetting agents;
 - d. A description of the type of air pollution control technique used to comply with Subpart N (e.g., add-on control device, wetting agent, etc.);
 - e. Copies of all documents pertaining to the operating time (i.e., whenever current and/or voltage was applied) over the 5-year period prior to the date of receipt of this request.
4. The maximum cumulative potential rectifier capacity of the Facility, which is defined as the summation of the total installed rectifier capacity associated with the hard chromium-electroplating tanks at the Facility, expressed in amperes, multiplied by the maximum potential operating schedule of 8,400 hours per year and 0.7;
5. For each chromium-electroplating tank that uses an add-on control device identified in response to item 2.d, above:
 - a. A description of the type of add-on control device (e.g., composite mesh-pad system, packed-bed scrubber, fiber-bed mist eliminator, etc.) if not already identified;
 - b. Copies of all documents pertaining to inspections over the 5-year period prior to the date of receipt of this request, including for any associated monitoring equipment;
 - c. Copies of all documents pertaining to the occurrence, duration, cause, and corrective action taken of each malfunction over the 5-year period prior to the date of receipt of this request, including for any associated monitoring equipment;
 - d. Copies of the reports of the results of all performance tests performed;

- e. Copies of all records listing, summarizing, or pertaining to monitoring data that are used to demonstrate continuous compliance with the emission limitations in Subpart N (e.g., pressure drop, velocity pressure, etc.) over the 5-year period prior to the date of receipt of this request.
6. For each chromium-electroplating tank that uses a wetting agent-type fume suppressant identified in response to item 2.d, above:
- a. The maximum surface tension value of the tank bath that corresponds to compliance with the applicable emission limitation;
 - b. Whether BPW uses a stalagmometer or a tensiometer to measure the surface tension of the tank bath;
 - c. Copies of all records listing, summarizing, or pertaining to measurements of the surface tension of the tank bath over the 5-year period prior to the date of receipt of this request;
 - d. Copies of all records listing, summarizing, or pertaining to additions of fume suppressant to the tank bath, including the date/time of the addition and the fume suppressant manufacturer and product name over the 5-year period prior to the date of receipt of this request.
7. For each chromium-electroplating tank that uses a foam blanket-type fume suppressant identified in response to 2.d, above:
- a. The minimum thickness of the foam blanket in the tank bath that corresponds to compliance with the applicable emission limitation;
 - b. Copies of all records listing, summarizing, or pertaining to measurements of the thickness of the foam blanket in the tank bath over the 5-year period prior to the date of receipt of this request;
 - c. Copies of all records listing, summarizing, or pertaining to additions of fume suppressant to the tank bath, including the date/time of the addition and the fume suppressant manufacturer and product name over the 5-year period prior to the date of receipt of this request.
8. A copy of the current operation and maintenance plan for the Facility required under Subpart N, along with copies of all superseded versions over the 5-year period prior to the date of receipt of this request;
9. Copies of all Initial Notifications required under Subpart N submitted to EPA or the Illinois Environmental Protection Agency (IEPA), including the date(s) on which these reports were submitted;
10. Copies of all Notifications of Compliance Status required under Subpart N submitted to EPA or IEPA, including the date(s) on which these reports were submitted;
11. For the 5-year period prior to the date of receipt of this request, a list of each tank that currently performs, or at one time performed, electroplating, electroless plating, chromate

conversion coating, nickel acetate sealing, sodium dichromate sealing, manganese phosphate coating, thermal spraying, electroforming, or electropolishing at the Facility and that uses or has emissions of any plating and polishing metal HAP, including the date each was constructed and the date each permanently ceased operation, if applicable. Do not include the tanks included in response to item 1, above;

12. For each electroplating, electroforming, or electropolishing tank identified in response to item 11, above, that operates at a pH of less than 12, an explanation of how BPW complies with Subpart 6W (e.g., wetting agent/fume suppressant, add-on control device, cover, etc.);
13. For each tank identified in response to item 11, above, that uses a wetting agent/fume suppressant:
 - a. Copies of all records pertaining to the manufacturer's specifications and instructions regarding the addition of wetting agent/fume suppressant to the tank bath;
 - b. Copies of all records listing, summarizing, or pertaining to the addition of wetting agent/fume suppressant to the tank bath over the 5-year period prior to the date of receipt of this request.
14. For each tank identified in response to item 11, above, that uses an add-on control device:
 - a. A description of the type of add-on control device (e.g., composite mesh-pad system, packed-bed scrubber, fiber-bed mist eliminator, etc.) if not already identified;
 - b. Copies of all records listing, summarizing, or pertaining to monitoring data that are used to demonstrate continuous compliance with the manufacturer's specifications and operating instructions over the 5-year period prior to the date of receipt of this request.
15. For each flash-electroplating tank identified in response to item 11, above, copies of all records over the 5-year period prior to the date of receipt of this request listing, summarizing, or pertaining to the operating time and the duration of time a cover is on the tank during plating operations.
16. For each electroplating tank identified in response to item 11, above, that uses cyanide in the tank bath, copies of all records listing, summarizing, or pertaining to measurements of the pH of the bath over the 5-year period prior to the date of receipt of this request;
17. For each dry mechanical polishing operation at the Facility, a detailed description of the capture and control system for particulate matter (PM) emissions, including, at a minimum, the type of filters used and manufacturer operating instructions and specifications;

18. For each thermal spraying operation at the Facility, a detailed description of the capture and control system for PM emissions, including at a minimum, the type of filters used and manufacturer operating instructions and specifications, plus copies of all records over the 5-year period prior to the date of receipt of this request listing, summarizing, or pertaining to the amount of time the thermal spraying occurs each day, and where it is conducted;
19. Copies of all Initial Notifications required under Subpart 6W that BPW submitted to the EPA or the IEPA, including the date(s) on which these reports were submitted.
20. Copies of all Notification of Compliance Status reports required under Subpart 6W that BPW submitted to the EPA or the IEPA, including the date(s) on which these reports were submitted.

Copies of all annual certifications of compliance reports required under Subpart 6W that BPW prepared and/or submitted along with any deviation reports, including the date(s) on which these reports were submitted.

Appendix C

Confidential Business and Personal Privacy Information Assertion Requirements

You may assert a business confidentiality claim covering any part of the information requested in the attached Appendix B, as provided in 40 C.F.R. § 2.203(b).

Emissions data provided under Section 114 of the CAA, 42 U.S.C. § 7414, is not entitled to confidential treatment under 40 C.F.R. Part 2.

“Emissions data” means, with reference to any source of emissions of any substance into the air:

Information necessary to determine the identity, amount, frequency, concentration, or other characteristics (to the extent related to air quality) of any emission which has been emitted by the source (or of any pollutant resulting from any emission by the source), or any combination of the foregoing;

Information necessary to determine the identity, amount, frequency, concentration, or other characteristics (to the extent related to air quality) of the emissions which, under an applicable standard or limitation, the source was authorized to emit (including to the extent necessary for such purposes, a description of the manner and rate of operation of the source); and

A general description of the location and/or nature of the source to the extent necessary to identify the source and to distinguish it from other sources (including, to the extent necessary for such purposes, a description of the device, installation, or operation constituting the source).

40 C.F.R. §§ 2.301(a)(2)(i)(A), (B) and (C).

If you wish to make a confidentiality claim, you must submit the requested information and state that you are making a claim of confidentiality. Any document for which you make a claim of confidentiality should be marked by attaching a cover sheet stamped or typed with a caption or other suitable form of notice to state your intent to claim confidentiality. The stamped or typed caption or other suitable form of notice should employ language such as “trade secret” or “proprietary” or “company confidential” and indicate a date, if any, when the information should no longer be treated as confidential. Information covered by such a claim will be disclosed by EPA only to the extent permitted and by means of the procedures set forth by Section 114(c) of the CAA, and 40 C.F.R. Part 2. Allegedly confidential portions of otherwise non-confidential documents should be clearly identified. EPA will construe the failure to furnish a confidentiality claim with your response to the Request to Provide Information as a waiver of that claim, and the information may be made available to the public without further notice to you.

Determining Whether the Information is Entitled to Confidential Treatment

All confidentiality claims are subject to EPA verification and must be made in accordance with 40 C.F.R. § 2.208, which provides in part that you must satisfactorily show that you have taken reasonable measures to protect the confidentiality of the information and that you intend to continue to do so; that the information is not and has not been reasonably obtainable by legitimate means without your consent; and that disclosure of the information is likely to cause substantial harm to your competitive position.

Pursuant to 40 C.F.R. Part 2, Subpart B, EPA may at any time send you a letter asking that you support your confidential business information (CBI) claim. If you receive such a letter, you must respond within the number of days specified by EPA. Your failure to submit your comments within that time would be regarded as a waiver of your confidentiality claim or claims, and EPA may release the information. If you receive such a letter, EPA will ask you to specify which portions of the information you consider confidential **by page, paragraph, and sentence**. Any information not specifically identified as subject to a confidentiality claim may be disclosed to the requestor without further notice to you. For each item or class of information that you identifies as CBI, EPA will ask that you answer the following questions, giving as much detail as possible:

1. For what period of time do you request that the information be maintained as confidential, e.g., until a certain date, until the occurrence of a special event, or permanently? If the occurrence of a specific event will eliminate the need for confidentiality, please specify that event.
2. Information submitted to EPA becomes stale over time. Why should the information you claim as confidential be protected for the time period specified in the answer to question 1?
3. What measures have you taken to protect the information claimed as confidential? Have you disclosed the information to anyone other than a governmental body or someone who is bound by an agreement not to disclose the information further? If so, why should the information still be considered confidential?
4. Is the information contained in any publicly available databases, promotional publications, annual reports, or articles? Is there any means by which a member of the public could obtain access to the information? Is the information of a kind that you would customarily not release to the public?
5. Has any governmental body made a determination as to confidentiality of the information? If so, please attach a copy of the determination.
6. For each category of information claimed as confidential, **explain with specificity** why release of the information is likely to cause substantial harm to your competitive position. Explain the specific nature of those harmful effects, why they should be viewed as

substantial, and the causal relationship between disclosure and such harmful effects. How could your competitors make use of this information to its detriment?

7. Do you assert that the information is submitted on a voluntary or a mandatory basis? Please explain the reason for this assertion. If you assert that the information is voluntarily submitted information, explain whether and why disclosure of the information would tend to lessen the availability to EPA of similar information in the future.
8. If there any other information you deem relevant to EPA's determination regarding its claim of business confidentiality?

If you receive a request for a substantiation letter from EPA, **you bear the burden of substantiating your confidentiality claim.** Conclusory allegations will be given little or no weight in the determination. In substantiating CBI claim(s), you must bracket all text so claimed and mark it "CBI." Information so designated will be disclosed by EPA only to the extent allowed by and by means of the procedures set forth in 40 C.F.R. Part 2, Subpart B. If you fail to claim the information as confidential, it may be made available to the public without further notice to you.

Personal Privacy Information

Please segregate personnel, medical, and similar files from the responses and include that information on a separate sheet(s) marked as "Personal Privacy Information." Disclosure of such information to the general public may constitute an invasion of privacy.

CERTIFICATE OF MAILING

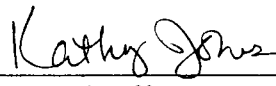

I, Loretta Shaffer, certify that I sent a Request to Provide Information Pursuant to the Clean Air Act by Certified Mail, Return Receipt Requested, to:

Mark Toni
President
Belmont Plating Works, Inc.
9145 King Street
Franklin Park, Illinois 60131

I also certify that I sent a copy of the Request to Provide Information Pursuant to the Clean Air Act by First-Class Mail to:

Eric Jones
Manager
Bureau of Air
Compliance and Enforcement Section
Illinois Environmental Protection Agency
1021 North Grand Avenue East
Springfield, Illinois 62794

on the 24th day of September 2015.

for Loretta Shaffer
Program Technician
AECAB, PAS

Certified Mail Receipt Number: 7014 2870 0001 9581 4250
